

AYUSH GOKHLE

Full-Stack Software Engineer | Node.js · TypeScript · Vue.js · React

Indore, Madhya Pradesh • +91 9977424526 • ayushgokhle@gmail.com • linkedin.com/in/ayush-gokhle-343521224

SUMMARY

Full-stack engineer with 3+ years shipping production features end-to-end — REST APIs and backend services in Node.js/TypeScript, paired with component-based frontends in React and Vue.js. Comfortable owning a feature from API/data-model design through customer-facing UI, with hands-on experience in relational and NoSQL databases, state management (Redux/Zustand), automated testing (Jest), and CI/CD. Currently deepening backend depth in NestJS, Docker/Kubernetes, and system design.

EXPERIENCE

Senior Consultant, Product Development — GenxAI

Sep 2025 – Present

Full-stack — React/TypeScript & Vue.js frontend, Node.js backend

- Own end-to-end feature delivery across the stack — designing REST APIs and backend services in Node.js/TypeScript, then building the corresponding React and Vue.js UI components for the core product.
- Design and build backend services, database queries, and REST endpoints that power customer-facing features, alongside client-side state management (Redux/Zustand).
- Partner with product, design, and backend engineers on technical design and API-contract discussions, translating requirements into shippable, testable features.
- Contribute to engineering standards — code reviews, reusable component patterns, and performance optimization — as a senior voice on the team.

SDE — AI Mantra

Apr 2025 – Sep 2025

- Built full-stack features across React Native (iOS/Android) and React.js web apps on a modular Node.js backend with Redux — cutting development time by 40%.
- Implemented AI-powered features (real-time data validation, multilingual NLP, dynamic visualizations) and backend APIs for AI-driven analytics, improving load speed by 25% and engagement by 35%.

Freelance Full-Stack Developer — Remote

Sep 2024 – Apr 2025

- Developed scalable web and mobile apps using React.js, Vue.js, React Native, and Node.js with Redux — achieving 50% code reuse and cutting platform-specific bugs by 20%.
- Architected a real-time AI-support chat app end-to-end (React frontend, Node.js/Express backend) with NLP-driven query handling.

Full Stack Engineer — Quantive

Jan 2023 – Sep 2024

- Delivered 3+ cross-platform products using React.js, Angular, and Flutter — cutting time-to-market by 45% through reusable, component-based architectures.
- Shipped 4+ key features with TypeScript and Redux; authored 35+ Jest test cases, raising usability ratings by 18%.

Software Developer Intern — IBM

Sep 2022 – Jan 2023

- Built a multi-signature crypto wallet (React.js, TypeScript, Solidity) and a decentralized Web3.js integration framework across 15+ apps, supporting 1,000+ daily transactions with zero breaches.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Vue.js, React Native, Angular, Redux, Zustand, TypeScript, JavaScript, HTML/CSS/SCSS

Backend: Node.js, REST API Design, GraphQL, Express, SQL, NoSQL (MongoDB), PWA

Testing & Quality: Jest, Code Review, Debugging (frontend & backend), CI/CD

DevOps & Tools: Azure DevOps, Git, Vercel, Docker/Kubernetes (fundamentals)

AI & Web3: OpenAI, LangChain, Pinecone, Web3.js, Solidity

Core CS: Java, C++, Data Structures & Algorithms

Currently Building: NestJS, Docker/Kubernetes, distributed system design

PROJECTS

- AskQ — AI-powered PDF Q&A platform (React.js, Node.js, MongoDB, LangChain, Pinecone, OpenAI); built REST endpoints for document ingestion and semantic search.
- LIP Token — GameFi web app (React.js, Solidity, Web3.js) with on-chain NFT minting, saving 10–50% on transaction costs.

EDUCATION & ACHIEVEMENTS

B.Tech, Computer Science — Shri Vaishnav Vidhyapeeth Vishwavidyalaya, MP, India (Aug 2019 – Jun 2023, CGPA 7.1)

Joint Secretary, Indore Cancer Foundation SVVV (2022) • Student Coordinator, Anveshan 2022
